

BIOCATALYST TECHNOLOGY MAKES GOOD STARTER PROGRAMS BETTER

A good starter program delivers the right nutrients in the right place at the right time.

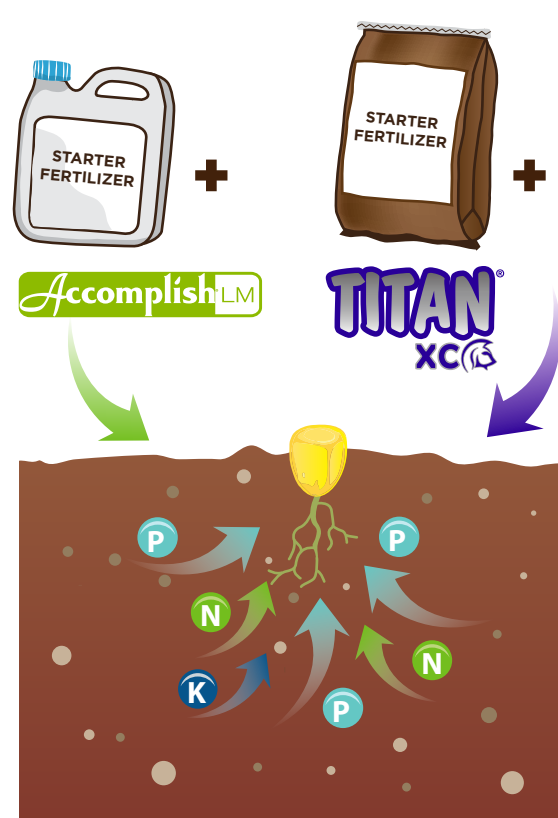

PROBLEM

Nutrients in starter and the soil aren't always in plant-available forms when crops need them.

SOLUTION

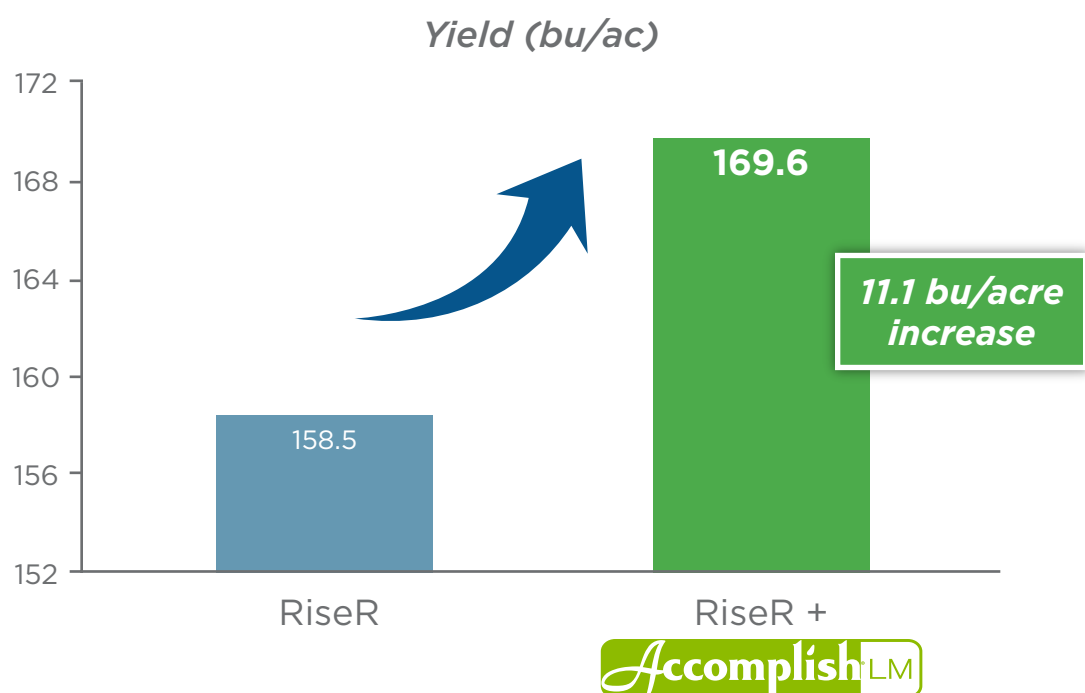

Biocatalyst technologies help get nutrients into the right form.

Concentrated biochemistry in Accomplish LM and Titan XC helps quickly convert nutrients into plant-available forms and facilitates nutrient uptake from starter applications.

THE RESULTS?

Sustainable, season-long benefits that include increased fertilizer efficiency, improved plant performance and higher yields.

Corn - Brookville, IN (2011)
Accomplish LM applied at 1 qt/ac with 2.5 gals RiseR®

Based on Nature. Built on Science.
