

More Nutrients. Less Stress.

ACCOMPLISH MAX is a next-generation biocatalyst that improves nutrient availability and increases crop tolerance to environmental stresses like cold temperatures, drought and salinity from applied fertilizers. Combine the power of **ACCOMPLISH MAX** with your existing fertility program for greater nutrient mineralization and less stress, so that you can help your crop live up to its full potential.

FEATURES

- Contains proven Accomplish biocatalyst technology for nutrient extraction and natural kelp-based technology for increased stress tolerance
- Designed for at-planting applications (in-furrow starters, 2x2 placement of liquid fertilizers)
- Compatible with most fertilizers, insecticides, fungicides and herbicides

GROWER BENEFITS

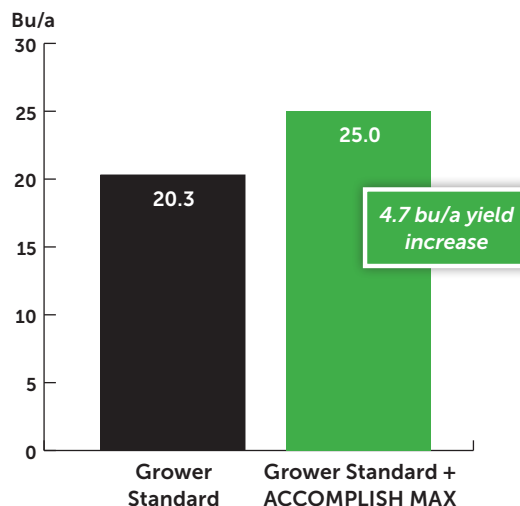

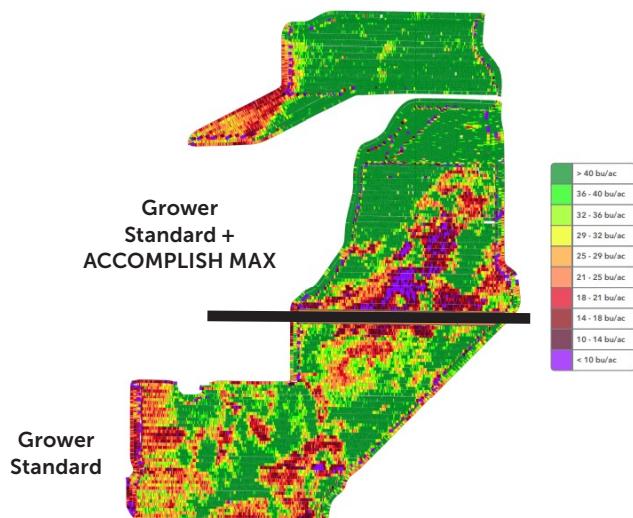

- Improves nutrient mineralization in the soil, even in suboptimal soil conditions
- Increases nutrient availability and uptake
- May increase crop tolerance to abiotic stressors like cold temperatures and salinity from commercial fertilizers

RATES

1 to 2 quarts/A with liquid starter fertilizers

Soybeans – Sauk Centre, MN (2021)

Accomplish MAX applied at 1 qt/acre in furrow

Note: Dryland soybeans; minimal rainfall
