

# ABOUT US

**Agricen is a plant health technology company delivering biochemical-based products that efficiently and sustainably enhance plant health and nutrition. Our products help growers meet the demands of modern agriculture by providing the most effective tools to increase nutrient availability and uptake, improve sustainability and increase yields. They also help turf and ornamental professionals get more out of their fertilizer programs by significantly improving fertilizer efficiency and plant performance.**

## Helping Growers Meet Today's Agricultural Challenges

Agricen is committed to delivering new solutions for agriculture - ones that are based on nature and built on science - so that farmers can grow the food we all need more efficiently and sustainably.

Agricen's innovative plant health products are biocatalysts that improve the availability and uptake of a broad range of nutrients from fertilizers and soil nutrient sources. By incorporating Agricen's products into their plant nutrition programs, growers can improve their nutrient use efficiency, boost plant performance and increase their yields economically and sustainably.

Agricen's products for agriculture are available under the Accomplish® LM, Extract PBA and Titan® XC brands available from Loveland Products through Crop Production Services. They are also available under the company's proprietary SoilBuilder™ brand.

## Solutions for the Turf and Ornamental Plant Industries

Agricen's plant health technology is also used throughout the turf and ornamental plant market, helping turf managers, nursery operators, landscape professionals, homeowners and gardeners get the most out of their fertilizer programs by sustainably improving plant health, quality and performance. Our turf and ornamental brands include SoilLife™ and NutriLife®.

Extract Powered by Accomplish is a trademark and Accomplish and Titan are registered trademarks of Loveland Products, Inc. SoilBuilder and SoilLife are trademarks and NutriLife is a registered trademark of Agricen.
